DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for the examiner's amendments to the claims was given in a telephone interview with John L. Rogitz (Reg #33549) on 1/25/2008 and 1/26/2008.

The application has been amended as follows:

Claim 7, line 1, replace "A hard disk drive controller executing logic" with -- A method for a hard disk drive controller, the method comprising--.

Claims 8 and 9, line 1, replace "The controller" with --The method--.

Claim 10, line 1, replace "A HDD" with --A Hard Disk Drive (HDD)--.

Status of Claims

Claims 1-15 are in the application,

Claims 1-6, and 11 are canceled. Claims 7-10, 12-18 are allowed.

Allowable Subject Matter

Claim 7 is allowed because the prior art of record does not teach or suggest that "A method comprising: in response to a selection of throughput optimization, determining at least one next command to execute in a queue of commands by determining a pipe length and

dividing the pipe by the sum of a pipe length, at least one time period, and at least one probability;

.... in response to a selection of the optimization based on number of operations per second, determining a next command to execute in a queue of commands by determining a number of commands in a pipe and dividing the product by the sum of a pipe length, at least one time period, and at least one probability, wherein the next command is accessed for execution.” as recited in the claim, and in combination with other remaining claimed subject matter set forth in the claimed invention.

Claim 10 is allowed because the prior art of record does not teach or suggest that “A Hard Disk Drive (HDD) comprising: means for determining a throughput benefit associated with executing each command; or means for determining an operational rate benefit associated with executing each command,

...wherein the means for determining a throughput benefit uses a pipe length in a numerator and in a denominator of a quotient in a way that the pipe length in the numerator does not cancel the pipe length in the denominator. “as recited in the claim, and in combination with other remaining claimed subject matter set forth in the claimed invention.

The remaining dependent claims, not specifically mentioned, are allowed for the same rationale as the independent claim(s) being based from.

Conclusion

When responding to the office action, Applicant is advised to provide the examiner with the line numbers and page numbers in the application and/or references cited to assist examiner to locate the appropriate paragraphs.
